For the invitation, many thanks.

I rather hesitate to tie myself down definitely at this point as I have some other uncertain plans for next summer. However I wonder if it would be agreeable to accept on behalf of Dr. G. Nossal who is arriving next month from Melbourne. Any paper on genetic immunology would be a joint contribution and I should leave it open whether he or I (or both) attend to present it.

Yours

John Lederberg

P.S. Madras in August? Why don't you come out West for the sea bunnies?
